

ASX Release | ClearVue Technologies Limited (ASX: CPV)

ClearVue receives the first order from its Middle Eastern Distributor

Highlights:

- Graftsol has placed its first order on ClearVue for 100 square metres of ClearVue PV glass
- Order value of USD \$45,000 plus duties, tax, insurance and shipping
- Graftsol to use the glass in a part of a new construction project in the UAE

1 May 2019: Smart building materials company ClearVue Technologies Limited (ASX:CPV) (**ClearVue** or the **Company**) is pleased to announce that further to its 27 February 2019 announcement that it has now received its first order from its licensed distributor in the United Arab Emirates, Graftsol General Trading LLC (hereafter **Graftsol**).

Graftsol has placed an order on the Company for 100 square metres of ClearVue integrated glazing units (IGU's) for an order value of USD \$45,000 before duties, tax, insurance and shipping. The panels to be used in part of a new construction project within the UAE.

As previously announced, such order will count against Graftsol's minimum performance requirements under its Distribution Agreement with ClearVue.

Commenting on the sale, Executive Chairman Victor Rosenberg has said:

"The sale represents our first sizeable sale and our first sale to a licensed distributor. We look forward to working with Graftsol to supply this first order and then to assisting them to establish themselves as our distributor in the region"

About ClearVue Technologies Limited

ClearVue Technologies Limited (ASX: CPV) is an Australian technology company that operates in the Building Integrated Photovoltaic (BPIV) sector which involves the integration of solar technology into building and agricultural industries, specifically glass and building surfaces, to provide renewable energy. ClearVue has

developed advanced glass technology that aims to preserve glass transparency to maintain building aesthetics whilst generating electricity.

Solar PV cells are incorporated around the edges of an Insulated Glass Unit (IGU) used in windows and the lamination interlayer between the glass in the IGU incorporates ClearVue's patented proprietary nano and micro particles, as well as its spectral selective coating on the rear external surface of the IGU.

ClearVue's window technology has application for use in the building and construction and agricultural industries (amongst others).

ClearVue has worked closely with leading experts from the Electron Science Research Institute, Edith Cowan University (ECU) in Perth, Western Australia to develop the technology.
