

QUARTERLY ACTIVITIES REPORT

March 2020

GME Resources Limited (“**GME**” or “**the Company**”) provides an update on its activities completed during the March 2020 quarter. The Company remains focused on advancing the NiWest Nickel-Cobalt Project (100%) (“**NiWest**” or “**NiWest Project**”) and other potential value creating initiatives.

COVID-19.

The Company has followed advice from Health Authorities and taken the necessary steps to protect people engaged with the Company’s activities. These measures included working at home and travel restrictions that currently apply for non essential work throughout the regions in WA. Over the period the Company set up work at home procedures/systems and cancelled all travel to the project area until the restrictions have been eased.

Whilst these sudden changes have impacted on ground activities, work has focussed on DMIRS statutory annual reporting. Measures have also been taken to reduce expenditure applicable to company administration and project costs for the 2020-21 period.

NiWest Nickel Cobalt Project

The NiWest Nickel Cobalt laterite Project hosts one of the highest grade undeveloped nickel laterite resources in Australia estimated to contain 81 million tonnes averaging 1.03% Nickel and 0.06% Cobalt. (Refer ASX announcement NiWest Resource Update 21 Feb 2017, refer Appendix 1). Over 75% of the resource falls within the Indicated and Measured categories.

The Company has completed extensive testing on a novel development approach that focuses on a fully integrated process flow sheet commencing with Heap Leaching of the ore followed by Direct Solvent Extraction (DSX) for the removal of impurities through to refining pure nickel sulphates and cobalt carbonate suitable for the high growth lithium-ion battery market.

An extensive Prefeasibility Study completed in September 2018 indicated a capital requirement of A\$900m and operating costs of US\$ 3.24/lb nickel based on production of 456kt nickel and 31.4kt cobalt over a 27 year mine life.

The Company has invested significant funds on the design of a technical and economic flow sheet over the past 12 years.

NiWest Project

Strategic Partner Discussions

As previously advised, GME has been engaging with potential investment partners for the NiWest development. This process is still on foot however the discussions have been deferred due to the COVID-19 outbreak. The Company expects these discussions will resume at a later date.

Waite Kauri

As previously reported the Company has completed a conceptual study on the development of a high grade open pit at the Waite Kauri project. No further work is envisaged until such time that a processing arrangement has been secured. Licenses to provide a haulage route to access the tenement have been applied for and are currently passing through the Native Title process.

Gold Assets

The Company has been reviewing its remaining gold assets which comprise three gold projects in the Murrin Murrin – Laverton region. The projects are all at various stages of exploration. The focus of the current work has been at the historical gold working around the Fairfield gold deposit at Lavertons Downs. Drillhole data validation and correction is in progress and modelling and internal studies will be undertaken to examine the potential of the project.

Nickel Market

Nickel prices declined a further 15% to US\$11,800 per tonne (US \$5.35/lb) and cobalt was down approximately 8% over the quarter to US\$30,000 per tonne (US \$13.60/lb). The recent falls can be attributed to significant market volatility driven by global growth uncertainty surrounding the commodity markets due to the COVID-19 pandemic.

Other

During the current quarter the Company made payments to related parties of \$54,000. This amount is comprised of Directors Remuneration.

<p>About GME <i>GME Resources Limited is an ASX listed exploration and development company with nickel and cobalt interests in Western Australia. GME's principal asset is its 100% owned NiWest Nickel-Cobalt Project situated adjacent to Glencore's Murrin Murrin Operation. In August 2018 the Company completed a Pre-Feasibility Study into the technical and economic viability of a heap leach and direct solvent extraction operation at one of the largest undeveloped nickel/cobalt deposits in Australia.</i></p> <p><i>In the March 2019 Quarter, GME completed a Level 1 flora, vegetation, terrestrial vertebrate fauna and fauna habitat assessment of the proposed Mt Kilkenny mining and processing area, Hepi mining area, Waite Kauri deposit and a haul road alignment. The survey results were consistent with previous surveys and did not identify any material issues of concern.</i></p> <p>More information is available on GME's website at www.gmeresources.com.au</p>		

NIWEST (NICKEL-COBALT) PROJECT

About NiWest

The NiWest Nickel-Cobalt Project is one of the largest high grade, undeveloped nickel-cobalt deposits in Australia. The project is located adjacent to Glencore’s Murrin Murrin operations in the North Eastern Goldfields of Western Australia. The project is situated in a semi-arid region that is well serviced by existing infrastructure (refer Figure 1).

Figure 1: NiWest Project Location and Infrastructure corridors

Pre-Feasibility Study Results

GME released the results of the Pre-Feasibility Study (“PFS”) on its 100%-owned NiWest Nickel-Cobalt Project during the September 2018 quarter.

Overview

- Head grades average 1.05% nickel and 0.07% cobalt for the first 15 years. Opportunity to extend high-grade profile through potential conversion of Inferred Resources and/or inclusion of other known deposits.
- Initial 27-year operating life at a nameplate processing capacity of 2.4Mtpa. Projected steady-state nickel and cobalt recoveries of 79% and 85% respectively.
- Total production of 456kt nickel (in nickel sulphate) and 31.4kt cobalt (in cobalt sulphate). Average annual production of 19.2kt nickel and 1.4kt cobalt over the first 15 years.

- Ungearing post-tax NPV_{8%} of A\$791M and internal rate of return (IRR) of 16.2% (equivalent pre-tax values of A\$1,390M and 21.2%, respectively). Payback period (pre-tax) of 4.4 years.
- Average cash unit operating cost (post royalties and cobalt credits) of US\$3.24/lb contained nickel (US\$3.00/lb for the first 15 years).
- Globally attractive pre-production capital intensity of sub-US\$20 per pound of average annual nickel production based on forecast pre-production capital expenditure of A\$966M.
- Projected free cashflow (post all capital expenditure and tax) of A\$3,342M.

COMPETENT PERSON STATEMENTS

NiWest Project

Where the Company refers to the NiWest Nickel-Cobalt Project Prefeasibility Study 2018 and the Mineral Resource and Ore Reserve Statement (referencing the release made to the ASX on 2 August 2018), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters continue to apply and have not materially changed.

Forward Looking Statement

This announcement contains statements related to our future business and financial performance and future events or developments involving GME Resources (GME) that may constitute forward-looking statements. These statements may be identified by words such as "potential", "exploitable", "proposed open pit", "evaluation", "expect," "future," "further," "operation, "development, "plan," "permitting", "approvals", "processing agreement" or words of similar meaning. Such statements are based on the current expectations and certain assumptions of GME management & consultants, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond GME's control, affect our operations, performance, business strategy and results and could cause the actual results, performance or achievements of GME to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements.

APPENDIX 1: NiWest Mineral Resource Statement

The Company's Mineral Resource Statement (Table B1 and Table B2) has been compiled in accordance with the Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The JORC Code 2012 Edition) and Chapter 5 of the ASX Listing Rules and ASX Guidance Note 31.

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities		Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity.</i>			
<i>Add notes as necessary for an understanding of the sources of finance available to the entity.</i>			
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	-	-
7.4	Total financing facilities	-	-
7.5	Unused financing facilities available at quarter end		-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. Estimated cash available for future operating activities	\$A'000	
8.1	Net cash from / (used in) operating activities (Item 1.9)	213
8.2	Capitalised exploration & evaluation (Item 2.1(d))	(341)
8.3	Total relevant outgoings (Item 8.1 + Item 8.2)	(128)
8.4	Cash and cash equivalents at quarter end (Item 4.6)	438
8.5	Unused finance facilities available at quarter end (Item 7.5)	-
8.6	Total available funding (Item 8.4 + Item 8.5)	438
8.7	Estimated quarters of funding available (Item 8.6 divided by Item 8.3)	3.42
8.8	If Item 8.7 is less than 2 quarters, please provide answers to the following questions:	
1.	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: No, the last quarter included a number of payments and receipts which are annual and will not re occur in the June or September quarters. In addition the Company's expenditure commitments will be managed in accordance with available cash.	
2.	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: GME will review its funding requirements and seek the support of its shareholders as required and is confident in the level of support it is likely to receive.	
3.	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
	Answer: Yes GME expects to be able to continue its operations and meet its business objectives on the basis that it enjoys the support of its shareholders.	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
