- Acquisition of further gold, rare earth or tech metal project opportunities;

3. Orion Metals and its operations

Overview of operations

Malcolm Creek Gold Project

The Company has a joint venture agreement (JVA) with Newmont Exploration Pty Ltd on this project specifically investigating the Bald Mountain intrusive complex in detail. Under the JVA, Newmont is obliged and has spent \$250,000 within the first year of participation and, if it elects, up to \$2 million to earn an interest up to 70% over four years.

Regional geochemical and geological surveys have been completed, and focus is now directed on the rhyolitic plugs and breccias. Previous exploration in the 1980s and 1990s has delineated gold-bearing structures which resemble the mineralisation controls at Kidston, 70kms to the east. Soil and rock geochemistry and induced polarisation geophysics has defined targets that are proposed to be drilled in the coming months after the current wet season.

Top Camp Gold Project

Interpretation of airborne and ground magnetic surveys and a re-evaluation of coincident geological and geochemical features have been successful in defining a magnetic anomaly drilling targets within the mining leases. This feature will be drill tested after the wet season in accordance with this fundraising.

Rare Earth Search

A number of exploration permits have been applied for and optioned from private parties in north and central Queensland to search for accumulations of heavy mineral concentrates that may host minerals containing rare earth elements. These have their provenance in radiogenic granites and associated rock types. Testing of new project tenements in north Queensland where rare earth bearing heavy mineral assemblages (including Monazite, Xenotime, Tin, Zircon etc) have been recorded in drainages associated with radioactive "hot" granites. Preliminary sampling to characterise mineral species is planned as soon as practicable.

Other areas of similar potential are being assessed.

Prospectus

The Company entered into a contract on 28 January 2010 with Gascoyne Metals Pty Ltd and Artemis Resources Limited (**Purchaser**) for the sale of the Grant's Gully - Buchanan's Creek Project (**Project**). The purchase price for the sale is \$450,000, comprising an option fee of \$25,000 and \$200,000 cash (**Cash Amount**) and shares in Artemis Resources Limited to the value of \$225,000 (**Artemis Shares**). Initial settlement and handing over of possession was completed on 28 January 2010 in conjunction with execution of the contract, at which time the Company received payment of the Cash Amount. Final completion and the issue of the Artemis Shares to the Company has taken place following the grant of Government consent to the transaction and the transfer of the tenements relating to the Project to the Purchaser. One hundred thousand dollars (\$100,000) worth of Artemis Shares (**Held Shares**) are to be held in escrow pending the grant and subsequent transfer of a tenement application from the Company to the Purchaser (**Application Transfer**). If the Application Transfer does not occur, the Held Shares shall be bought back or cancelled for no consideration.

As at the date of this Prospectus, Metallica has a holding or relevant interest of approximately 47.24% of the Company. Metallica has confirmed in writing to the Company that it will take up part of its Entitlement of \$250,000 in New Shares.

The extent to which the current Shareholders of the Company elect to accept their entitlement to New Shares under this Offer and the extent to which the Underwriters take New Shares pursuant to the terms of their Underwriting Agreements with the Company will have a potential impact upon the equity holding and control of the Company.

Prospectus

The table below outlines the potential maximum effect that several scenarios will have on the equity and control of the Company if only Metallica accepts the offer or if other shareholders accept the offer:

	Holding as at the date of this Prospectus	%	If only Metallica accepts Offer and only takes up Entitlement of \$250,000 of New Shares ¹	%	If Metallica only takes up Entitlement of \$250,000 and remaining Shareholders take up full Entitlement	%	If Metallica only takes up \$250,000 of its Entitlement and the Shareholder Underwriters apply for their Entitlement and all Underwriters apply for their Underwritten Shares	%	If only Metallica accepts Offer and takes up all Shortfall ⁵	%

Notes

¹ Metallica has confirmed in writing that it will only take up part of its Entitlement of \$250,000 in New Shares.

² This number does not include Shareholders who have indicated to the Company that they will not be taking up their Entitlement.

³ This number includes the Entitlement and Underwritten Shares that the Shareholder Underwriters would apply for pursuant to their respective Underwriting Deeds.

⁴ This number only represents the Underwritten Shares applied for by Non-Shareholder Underwriters. For the Underwritten Shares applied for by Shareholder Underwriters see Note 3 above.

⁵ In the unlikely event that Metallica takes up its full Entitlement and all of the Shortfall, this scenario will require documentation to be put in place whereby Metallica confirms that it will apply for its Entitlement as well as any Shortfall.

5. Risk factors

5.1 Introduction

Activities of the Company, as in any business, are subject to risks which may impact on its future performance. The Company has put in place appropriate actions, systems and safeguards for known risks, however some are outside of its control. The principal risk factors are described below.

You should carefully consider the risks and uncertainties set out below and the information contained elsewhere in this Prospectus before you decide whether to accept New Shares.

5.2 General mining risks

An investment in the New Shares should be considered speculative due to the nature of the mining industry generally. Exploration from minerals involves many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. There can be no assurance that the Company's intended exploration targets will lead to the development of mining operations.

5.3 Share price fluctuations

The market price of the Company's Shares will be subject to varied and often unpredictable influences in the share market. Both domestic and world economic conditions may affect the

Prospectus

performance of the Company. Factors such as the level of industrial production, inflation and interest rates impact all commodity prices including minerals.

5.4 **Management actions**

The Directors of the Company will, to the best of their knowledge, experience and ability (in conjunction with their management) endeavour to anticipate, identify and manage the risks inherent in the activities of the Company, but without assuming any personal liability for same, with the aim of eliminating, avoiding and mitigating the impact of risks on the performance of the Company and its securities.

5.5 **Government policy**

Changes in relevant taxation, interest rates, other legal, legislative and administrative regimes, and Government policies in Australia, may have an adverse effect on the assets, operations and ultimately the financial performance of the Company and the market price of its securities.

5.6 **Native title**

The High Court of Australia has recognised traditional native title rights to the land and the Commonwealth and States have passed legislation relating to native title which provides for native title claims to be made. Native title claims may be a risk in respect of future development and exploration activities of the Company.

5.7 **Environmental regulations and risks**

National and local environmental laws and regulations affect nearly all of the operations of the Company. These laws and regulations set various standards regulating certain aspects of health and environmental quality provide for penalties and other liabilities for the violation of such standards and establish, in certain circumstances, obligations to remediate current and former facilities and locations where operations are or were conducted.
